The Tasmanian wedge-tailed eagle is territorial, with territory sizes in the Bass District around 20–30 km<sup>2</sup> (Bell and Mooney, 1999). Territories contain several alternate nest sites, but one nest is usually re-used each year until breeding fails ( Mooney and Holdsworth, 1991 ).

The previous HRM research suggested that HRM practices have an impact on organizational performance through employee motivation. Employee motivation provides better employee outcomes and found to have a significant impact on productivity and performance (e.g., Gelade & Ivery, 2003; Huselid, 1995).

complexity of a model iteratively. An important issue in modeling is model validity. Model validation techniques include simulating the model under known input conditions and comparing model output with system output. Generally, a model intended for a simulation study is a mathematical model developed with the help of simulation software.
